Subject: Comments regarding the draft Portland Harbor Superfund Cleanup Plan

From what I understand of the Superfund Cleanup Plan, I want to make the following comments of concern for the inadequacy of the plan.

1. The geographic area covered by the plan is far too small. At least 1000 acres of polluted sediment should be targeted for removal.
2. Dredged toxic waste must be taken to an appropriate landfill. Creation of a toxic waste disposal dump in the river is not acceptable.
3. Reasonable efforts must be made to identify the entities responsible for the pollution (including retroactively) and to hold them accountable to pay their share toward a comprehensive cleanup.

Thank you.
